

# The Early Bird

The museum is big and there is a lot to explore. From exhibits to live shows and all the interactions in between, here is one suggested path for the early go-getter to help guide your experience and spend 3.5+ hours with us.

- Make your way to the **Franklin Air Show** exhibit (Floor 2) to learn the dynamics of flight and don't forget to check out the 1911 Wright Model B Flyer.
- Gather your crew and fly down to the Fels Planetarium on Floor 1 for the **To Space & Back** show.
- Now that you've seen how vast space is, head up to the first level of **Wondrous Space** (Floor 2) to discover more of what lies beyond Earth.
- All this exploration can work up an appetite, so make your way across to **The Eatery** (Floor 2) to grab some fuel.
- Now is a perfect time to feed your creativity with a ticket for **The Art of the Brick**, the entrance is on Floor 2, next to the SciStore.
- Feeling a burst of creativity after leaving the exhibit? Make your way to the **Combustion Show** in Demonstration Theater to see some real live explosions.
- Sensing your adventure come full circle, take off and explore the second level of **Wondrous Space** (Floor 3) to design your own rocket, and see pieces of real space technology.

*There may still be a lot to see but that's a good place to start, remember there's more inside!*

# The Early Bird

- **10:30 am**

- **To Space and Back**
