

The Afternoon Decision Maker

The museum is big and there is a lot to explore. From exhibits to live shows and all the interactions in between, here is one suggested path for the afternoon post-lunch visitor looking to feed their curiosity and spend 3.5+ hours with us.

- Wondering where is the best place to start? One option is to check out the **Your Brain** exhibit (Floor 2) to learn how brain cells use chemical and electrical signals to communicate at incredible speeds and help you make decisions.
- Neurons aren't the only things that feel a spark, have your own shocking experience with our **Electricity Show**, down in Franklin Theater (Floor 1).
- Like a shared electron, go with the flow and journey to Floor 3 and flip a coin, if it's heads, check out **SportsZone** and learn about the importance of helmets, if it's tails, head to **Sir Isaac's Loft** to explore the chain reactions, and optical illusions that brings Newton's laws to life.
- Maybe you have time to check out both exhibits but give yourself some wiggle room so you can make your way to Floor 2 to see what our performer decides to dissect at the **Mystery Dissection** located in The Bypass, behind the Atrium ramp.
- For a recharge, head over to the **Café** to grab a quick snack and if the weather is looking good, enjoy it outside at our picnic tables in **Science Park**. If you don't need a caffeine fix, check out **Amazing Machine** next door.
- Still time for one final decision for your day, and that is 'Decisions,' Brick artist Nathan Sawaya's largest piece on display in **The Art of the Brick**.

*There may still be a lot to see but that's a good place to start,
remember there's more inside!*
